

Easy to operate, with a large LED display screen showing date, time, battery charge and signal strength.

Example of a possible escalation procedure:

GPS SOS alarm- HELP with the push of a button

4G SOS Alarm

- 24/7 Security Monitoring
- 'Man Down' Feature

GPS Portable SOS Alarm working on Telstra's 4G CAT-M1(IoT)

Mobicare is a user friendly hardware design that can be used in a crisis situation. The product can be worn under clothing.

There is one large button in the middle of the product. Once pressed, it will send out a duress alarm with GPS co-ordinates of the location.

When the SOS alarm is started the product will vibrate letting the end user know that help is on the way. Mobicare has a 3 dots Braille on the SOS button, allowing for the product to be used effectively in the dark or by people with a disability.

This product has the latest 4G technology working on Telstra's new 4GX network. 4GX offers the most comprehensive network coverage in Australia.

Ensure Work Health Safety For Outreach, Lone & Community Workers

This new technology 4G GPS tracker with SOS alarm and man-down feature is small, lightweight and can go wherever you go.

This safety device offers visibility, flexibility and protection for your field personnel. With the push of a button a silent distress alarm will be delivered to an ASIAL approved 24/7 monitoring company. The escalation is executed according to an agreed procedure.

Portable 4G GPS SOS alarm with 24/7 monitoring by ASIL Grade 1 approved security monitoring company.

“So small that it can go wherever you go -
for added safety and peace of mind”
